

COUNTY OF VENTURA 2025 TRAFFIC VOLUMES

COUNTY OF VENTURA
PUBLIC WORKS AGENCY
ROADS & TRANSPORTATION

PUBLIC
VENTURA COUNTY
WORKS

PREFACE

Traffic Volumes (September 11 to February 1)

This report lists vehicle traffic volumes obtained by the County of Ventura, Public Works Agency Roads & Transportation Department for various roadway locations within the unincorporated area of Ventura County. The Average Daily Traffic (ADT), the morning peak hour volume, and the evening peak hour volume are listed for each location counted. Traffic counts from the four previous years are also shown. All traffic volume figures listed reflect combined totals for both directions of travel.

Average Daily Traffic (ADT)

Average Daily Traffic in this report is defined as the total traffic counted on an average weekday. The ADT volume is rounded to the nearest one hundred vehicles. A countywide program of regular and systematic traffic count sampling is conducted through the use of permanent count stations using loop detection and mechanical counting devices moved from location to location. The traffic counts are useful for presenting a countywide picture of traffic flow, evaluating traffic trends, computing accident rates, roadway planning, designing highways and other traffic oriented purposes.

Hourly AM/PM Peak Hour Traffic

Hourly AM/PM Peak is defined as the total traffic count during the highest volume hour in the morning/afternoon on an average weekday. The volume is then rounded to the nearest ten vehicles. This data is useful for evaluating highway capacity and other traffic operational studies.

Special Counts (Appendix A)

Vehicle traffic volumes showing the ADT, AM and PM Peak, obtained during studies on non-master count roadways, are compiled in Appendix A at the end of this document. The duration of these counts are 24 hours. Special counts can be useful for general information, road maintenance planning and neighborhood traffic studies.
