

**COUNTY OF VENTURA
PUBLIC WORKS AGENCY – WATERSHED PROTECTION
INFORMATION MEMORANDUM
12/29/2025**

EMERGENCY FLOOD REPAIR REGULATORY INFORMATION FOR PRIVATE PROPERTIES

Under normal circumstances, construction, facility and vegetation maintenance, and repairs within the bed and banks of streams on private property requires permits from Watershed Protection (<https://www.onestoppermits.vcrma.org/departments/watercourse-encroachment>) and up to 5 state and federal agencies. Under emergency circumstances, the same regulations apply, but the permitting processing (if needed) can take place during and after the emergency activities. It is best to contact the regulators before or as soon as possible after work needs to take place to protect life and property. Emergency work includes levee, bank, road, and utility line (water, sewer, power, etc.) repairs needed to prevent structures and roads from eroding into the riverbeds as soon as it is safe to do the work.

A full guide to permitting work in streams and other waterways can be found here:
<https://docs.vcrma.org/images/pdf/planning/conservation/wetlands-permitting-guide.pdf>

For emergencies, a list of local regulatory agency staff and links to permitting information is on page 2 of this document. In general, private landowners will need to provide a location map, parcel number, nature of the work needed/being undertaken, dates of damage, dates of repairs, conditions of the watercourse, photos, and other pertinent information. The work should be the minimum necessary to prevent further damage. A full repair may need to wait for both complete permitting and more favorable work conditions.

The Natural Resources Conservation Service (NRCS) has a variety of programs that may help fund restoration of private properties affected by floods and other natural disasters. The local NRCS Oxnard office contacts are provided below:

Oxnard Field Office, 3550 S. Harbor Blvd., Suite 2-202, Oxnard, CA 93035-4150, phone: 805-984-2358
Brooks Engelhardt, District Conservationist 805-984-2358 x101, C: 760-217-9197
Jordan Atmore, Soil Conservationist, 805-984-2358 x109
Haejin Lee, Team Agricultural Engineer, 805-984-2358 x102, C: 760-963-4551
